Grace report 9/17/85 ⁶	all workers	1984			30					

¹ "Asbestosis" includes asbestosis and asbestos related pleural disease.² The CARD Mortality Study includes all patients seen at CARD or by Dr. Whitehouse in Spokane, WA, who were diagnosed with ARD, and for whom films and charts were available.³ Expert Report by Dr. Alan C. Whitehouse, Exh. 7.⁴ Trachea, bronchus or lung cancer, Table 2.⁵ Table 1, includes "any mention of condition" on death certificate.⁶ Attached to Expert Report by Dr. Alan C. Whitehouse, Exh. 22. The list totals 32; but two are excluded, net 30.⁷ Includes all with asbestos related disease (ARD), as a significant factor in the death, except lung cancer and mesothelioma.⁸ See Table 3, ICD 160-163.⁹ Includes living mesotheliomas.¹⁰ Expert Report of Dr. Alan C. Whitehouse, Exh. 7¹¹ This study was limited to persons resident in Lincoln County, MT at death.¹² Eight more mesotheliomas were found, but were not included as they were not residents of Lincoln County at death.¹³ All in Libby cohort (defined as exposed to Libby asbestos in Lincoln County, Montana).¹⁴ Table 10, "all non-malignant respiratory (480-519)," workers and non-workers 162.

End date for data in the study.
